

ECON

props

ECON props are the right choice for every kind of use giving effective assistance in daily work on the construction site.

Lightness, combined with high load capacity, ensures a higher yield in the phase of assembly / disassembly.

- Material: galvanized steel
- Load capacity: min. 20KN fully extended
- Standard: B/D class according UNI EN1065
- Greater performance during assembly phase due to reduced weight
- Anti-slip device to work safety
- High durability thanks to quality galvanizing and adjustable die-casted nuts

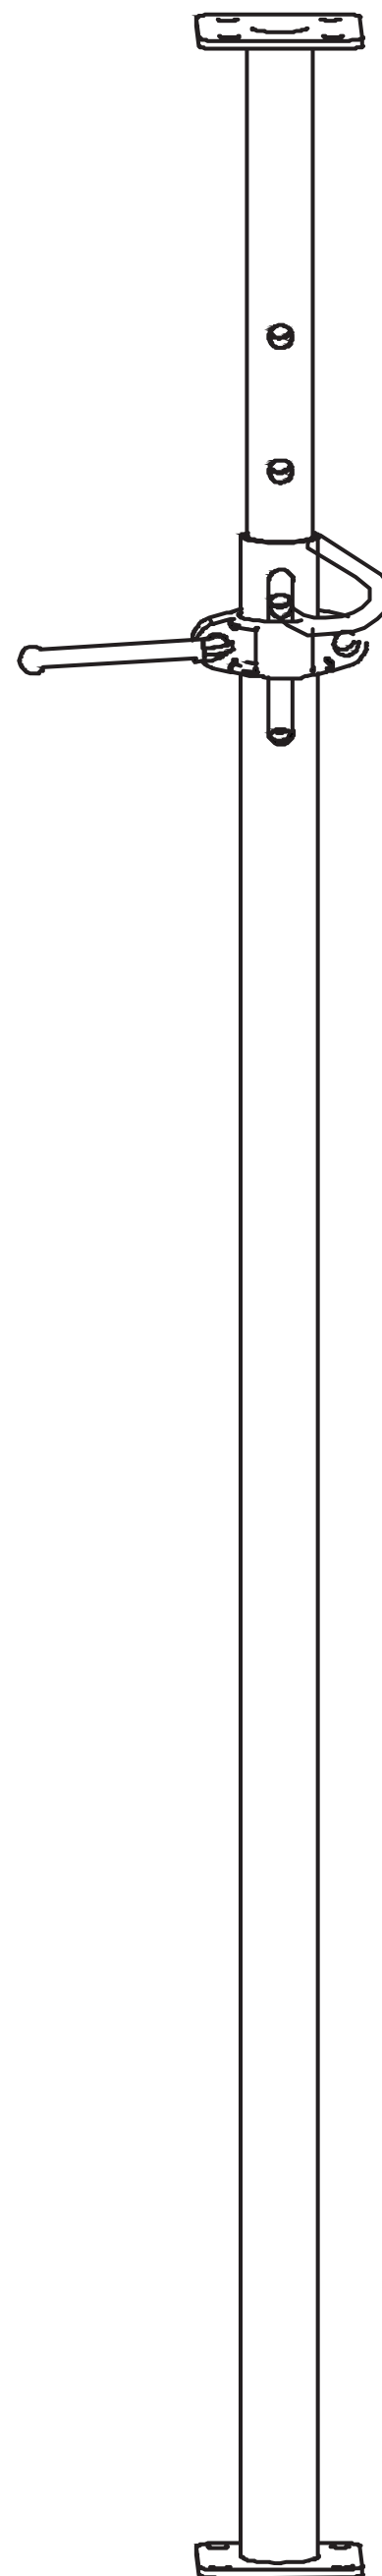

▼ Transport and storage

For storage and handling Condor provides the container for props cod. 52229

Capacity: 60 props per container

Features: resistant, durable, stackable.

Handling: suitable for handling with crane, pallet, forklift

▼ Technical Data

Cod.	Description	Extension(m)	Weight(kg)
40101	ECON-300	1,80 ÷ 3,00	15,95
40102	ECON-350	2,00 ÷ 3,50	17,20
40103	ECON-400	2,30 ÷ 4,00	20,10
